EDUCATION

Rajshahi University of Engineering and Technology, Rajshahi (RUET) 2020 -2025
BSc in Electrical and Computer Engineering
CGPA- 3.66 (Ranked 10th)

INDUSTRIAL ATTACHMENTS

BJIT | Developer | (1 week) [↗](#) 2024

- Developed a CNN-based desktop application "Car vs Bike Classification" using ResNet18, achieving 98% test accuracy.
- Created a user-friendly Tkinter GUI and documented code with Python docstrings.
- Managed the project with Redmine (Agile-Scrum) and implemented version control using Git.

Monstarlab Bangladesh | Developer | (2 weeks) [↗](#) 2024

- Contributed to frontend development and resolved bugs in a React JS-based team project "Amrao-Pari", an educational website.
- Deployed the application on Firebase, collaborated using Jira (Agile-Scrum) and implemented version control with Git.

PROJECTS

To-Do List CLI Project [↗](#) 2025

- Developed a Node.js based CLI project delivering full CRUD task management through command driven operations.
- Enhanced user experience with Chalk library for colored output and clean JavaScript logic for clear, readable terminal interactions.
- Built a modular and maintainable code structure.

Bachelor Thesis: Deepfake Image Detection Using Transfer Learning with Explainable AI. [↗](#) 2025

- Developed a Deepfake Image Detection system using Transfer Learning and Explainable AI with LIME on a dataset of 140k images.
- Fine-tuned pretrained CNN architectures (Inception V3, InceptionResNet V2, Xception) to enhance model performance.
- Achieved 98% test accuracy with 95% generalization, ensuring reliable detection.

Krishti- An e-commerce website for local products and crafts [↗](#) 2023

- Built a secure OTP-based login system with cart management feature using HTML, CSS, Bootstrap, JavaScript, PHP and MySQL.
- Integrated Google SMTP server to ensure reliable OTP delivery and strengthened authentication security.

Freshers Friendly RUET Website- A frontend website [↗](#) 2023

- Developed a platform offering study materials, rollmates, and nearby accommodations using HTML, CSS, PHP, and MySQL.
- Integrated features for clubs & communities information and administrative support to enhance user experience.

SKILLS

- **Programming and Core Skills:** C, C++, Vanilla JavaScript, Node.js, React.js, Python, Java, PHP, MySQL, OOP, DSA.
- **Tools and Technologies:** Linux, Bash Scripting, AWS, Git, Github, Jira, Redmine.

UPSKILLING (ONGOING)

- **5 days AI Agent Intensive Course** by Google and Kaggle, focusing on agent architectures, advanced tools, context engineering.
- **MERN and AI** by Bongodev, focusing on MERN full-stack development, REST API, Docker, CI/CD and foundational AI agent

ACHIEVEMENTS

- **Selected in Top 75** for "3rd Shoktikonna Leadership Cohort 2025", hosted by European Union in Bangladesh and The World Bank.
- **Winner**, Quiz Contest "Hands-on Python: Introduction to Machine Learning Universe 2023", organized by IEEE RUET SBC.
- **Finalist**, "Anweshan 1.0" - Inter-University Idea Presentation Competition.
- **Earned completion badges** for "Prompt Engineering Guide" and "Introduction to Generative AI" by Google Cloud.

EXTRACURRICULAR ACTIVITIES

- **Participant**, Webinar: "Revolutionizing Industries with Artificial Intelligence and Machine Learning 2023", organized by IEEE CSRSB
- **Volunteer** (Guest Management), "AURORA: National Science Festival 2023"
- **Volunteer** (Audience Coordination), American Center Pop-up 2022, organized by US Embassy
